## *The Airport SafetyKeepers*

in

### **Vigilance Stopped Sam**

In the world of aviation, two unsung heroes are part of a team working tirelessly to keep the airport safe and secure. They are Max and Ava, two members of the Airport SafetyKeepers. Ava is a vigilant gatekeeper, always on the lookout to ensure airside access gates and terminal doors are kept closed and locked. Max is the master of airport security credentials, who can spot a fake ID from a mile away.

Their bond is not just professional; Ava and Max are the best of friends who would often share stories and laugh about their escapades. But they had a nemesis: Suspicious Sam, who always tried to sneak into restricted areas.

During her daily patrol, Ava spotted an airside gate that was open and unattended. Her instincts told her something wasn't right and she called for backup. Max arrived in a flash, and together they secured the gate.

Max's radio crackled with a message from Operations Control that an airport worker had reported a suspicious individual was trying to access the restricted area. It could only be one person - Suspicious Sam. He alerted Ava and they converged on Sam's location.

A tense confrontation unfolded as Ava and Max confronted Sam, who tried to flee. But Ava's agility and Max's ID expertise proved too much for Sam to handle. The airport officers arrived swiftly to apprehend Suspicious Sam. Ava and Max's vigilance and teamwork had once again saved the day, and the airport's safety was secured.

You, too, can be an Airport SafetyKeeper by making sure gates and doors are closed and secured before you walk away from them; always wearing and displaying your valid RAIC; monitoring for and reporting unattended baggage and challenging individuals who look out of place - it might just be Suspicious Sam!
